

# DATA SHEET

## BASIC METAL BOX

### 1. DESCRIPTION AND USE

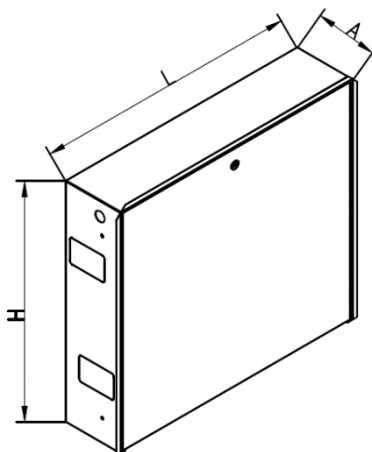

The NeoTer metal boxes can be used in various applications such as:

- underfloor heating systems
- radiator heating systems
- plumbing systems

### 2. TECHNICAL CHARACTERISTICS

- The boxes are made of steel sheet and painted in an electrostatic field, and they are highly resistant to corrosion.
- The doors of the boxes are equipped with locks that can be easily operated with a screwdriver or a coin.
- The depth of the housings can be adjusted between 120-160 mm.
- The sides are pre-cut for supplying the manifold/distributor kit on the side.
- Two guide rails are mounted on the back to facilitate the installation of the distributor-manifold inside the housings.
- Flush mounting.

Name	Internal code	L [mm]	h [mm]	A [mm]
500X450X120-160 METAL BOX (2-5 circ. WITHOUT AM KIT)	NEOCM500	500	450	120-160
